Workflow

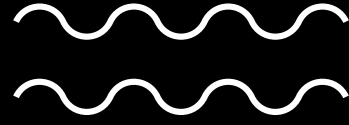

Understanding the problem, user needs
and goals.

Start writing the actual code

Hosting the website/app

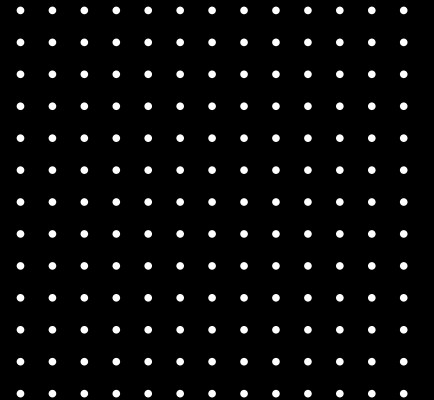

Design

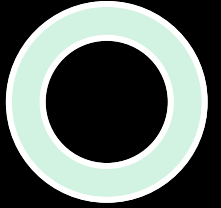

Wireframe of a screen

Using Figma

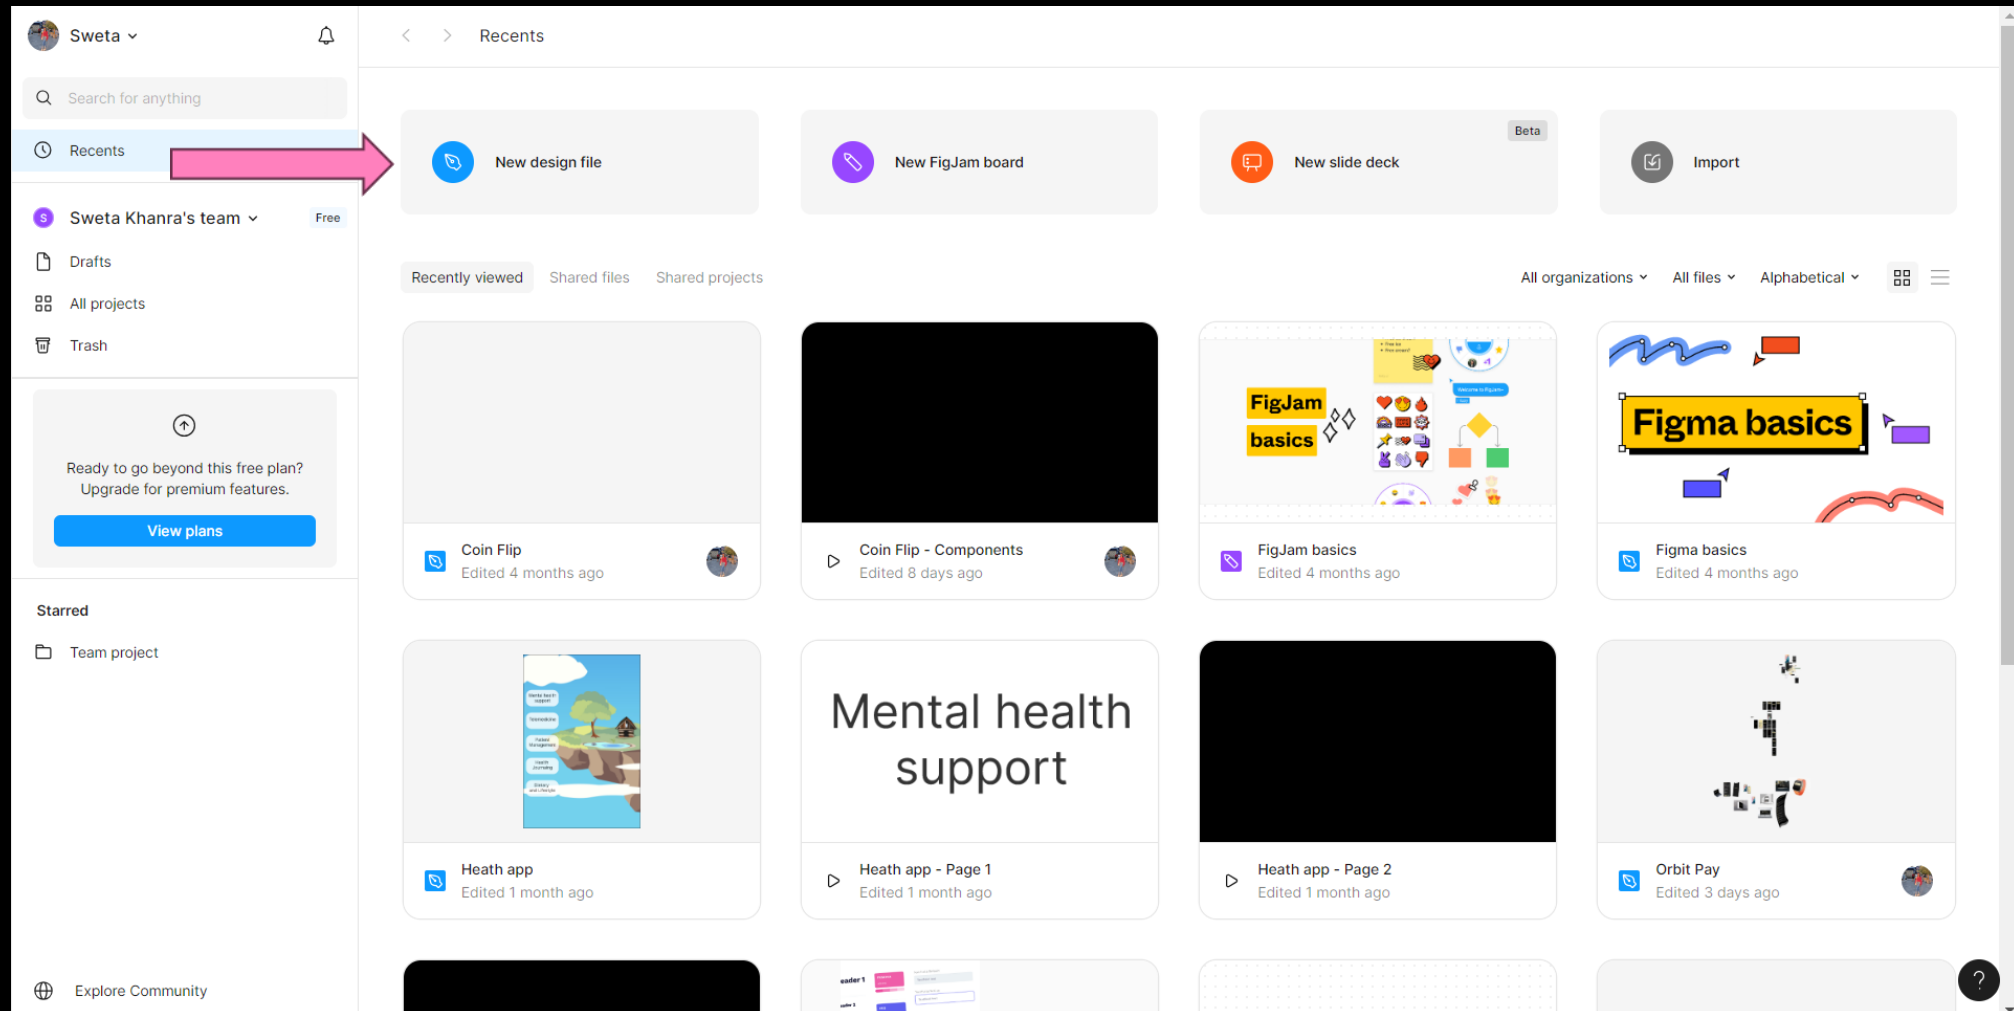

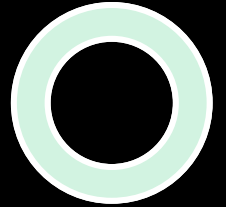

Login / Signup

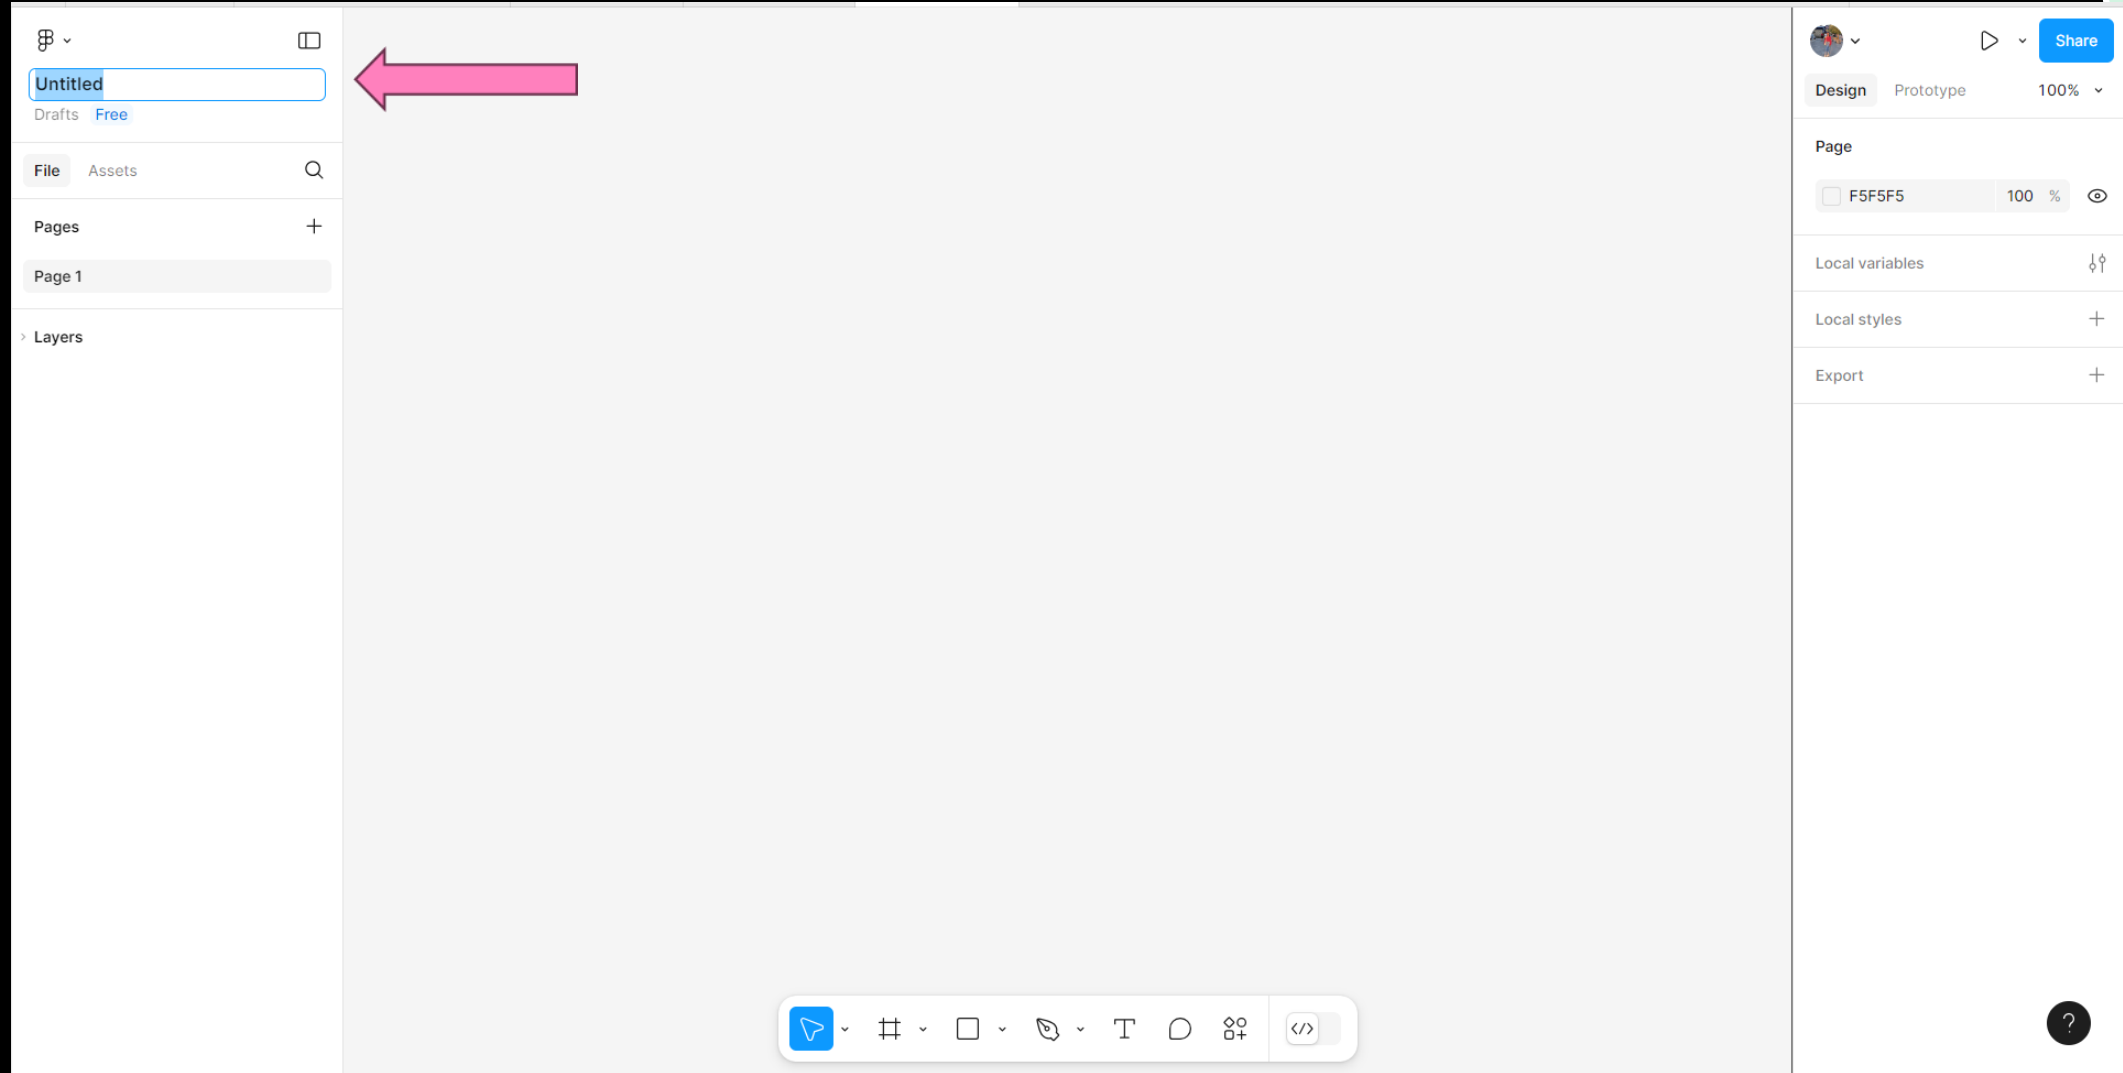

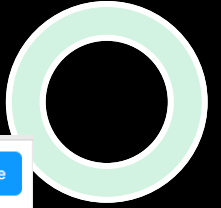

The screenshot shows a Google search for "figma login". The search bar contains "figma login". The first search result is from "Figma" with the URL "https://www.figma.com › login". A pink arrow points to the "Login | Figma" link. Below the link, the text reads: "Sign in to Figma. Continue with Google, or, Email, Password. Log in. Use single sign-on. Reset password. No account? Create one." Below this, there are links for "Login", "Signup and Login", "Continue with Google", "Log in", "Sign up/Login", and "More results from figma.com »". The second search result is also from "Figma" with the URL "https://www.figma.com › community › file › login-sign...".

New design file

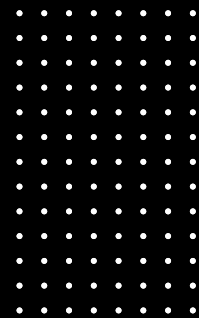

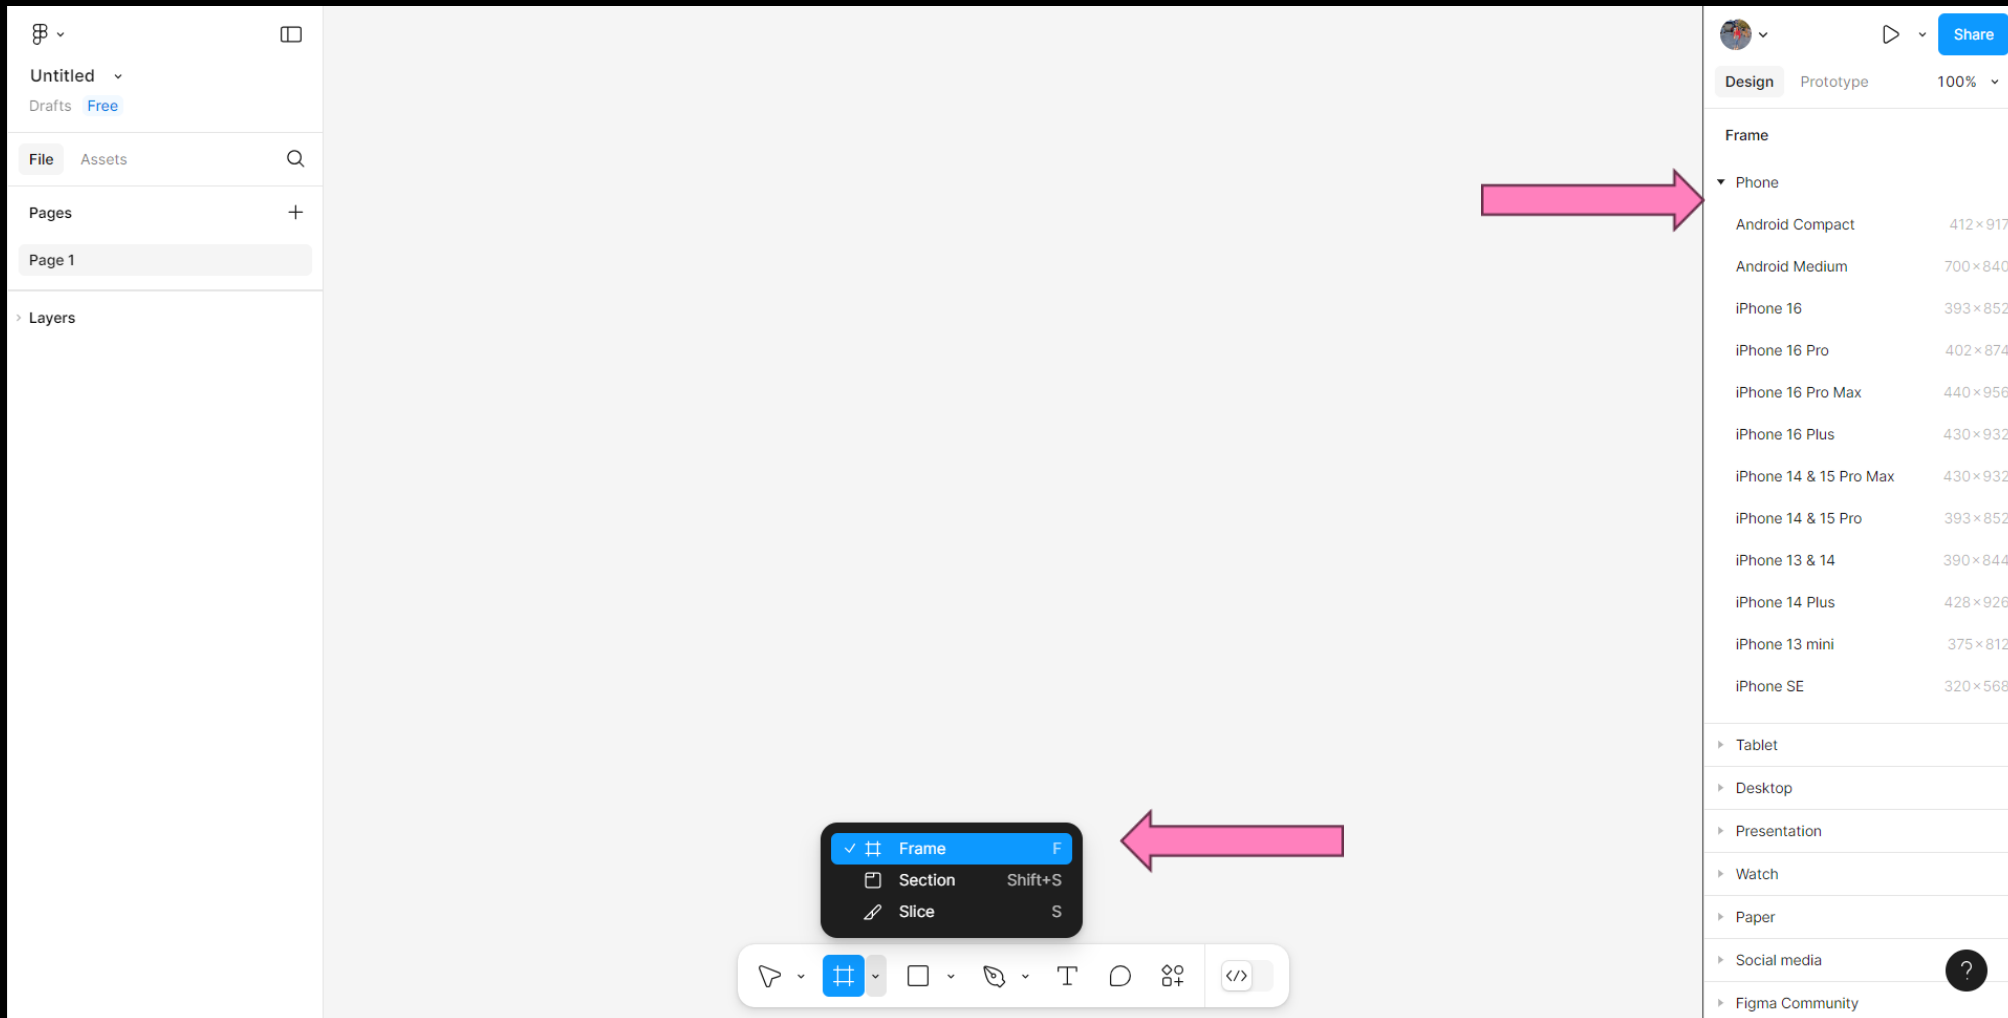

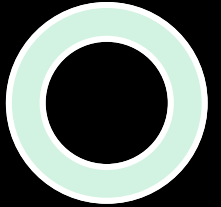

Name the page

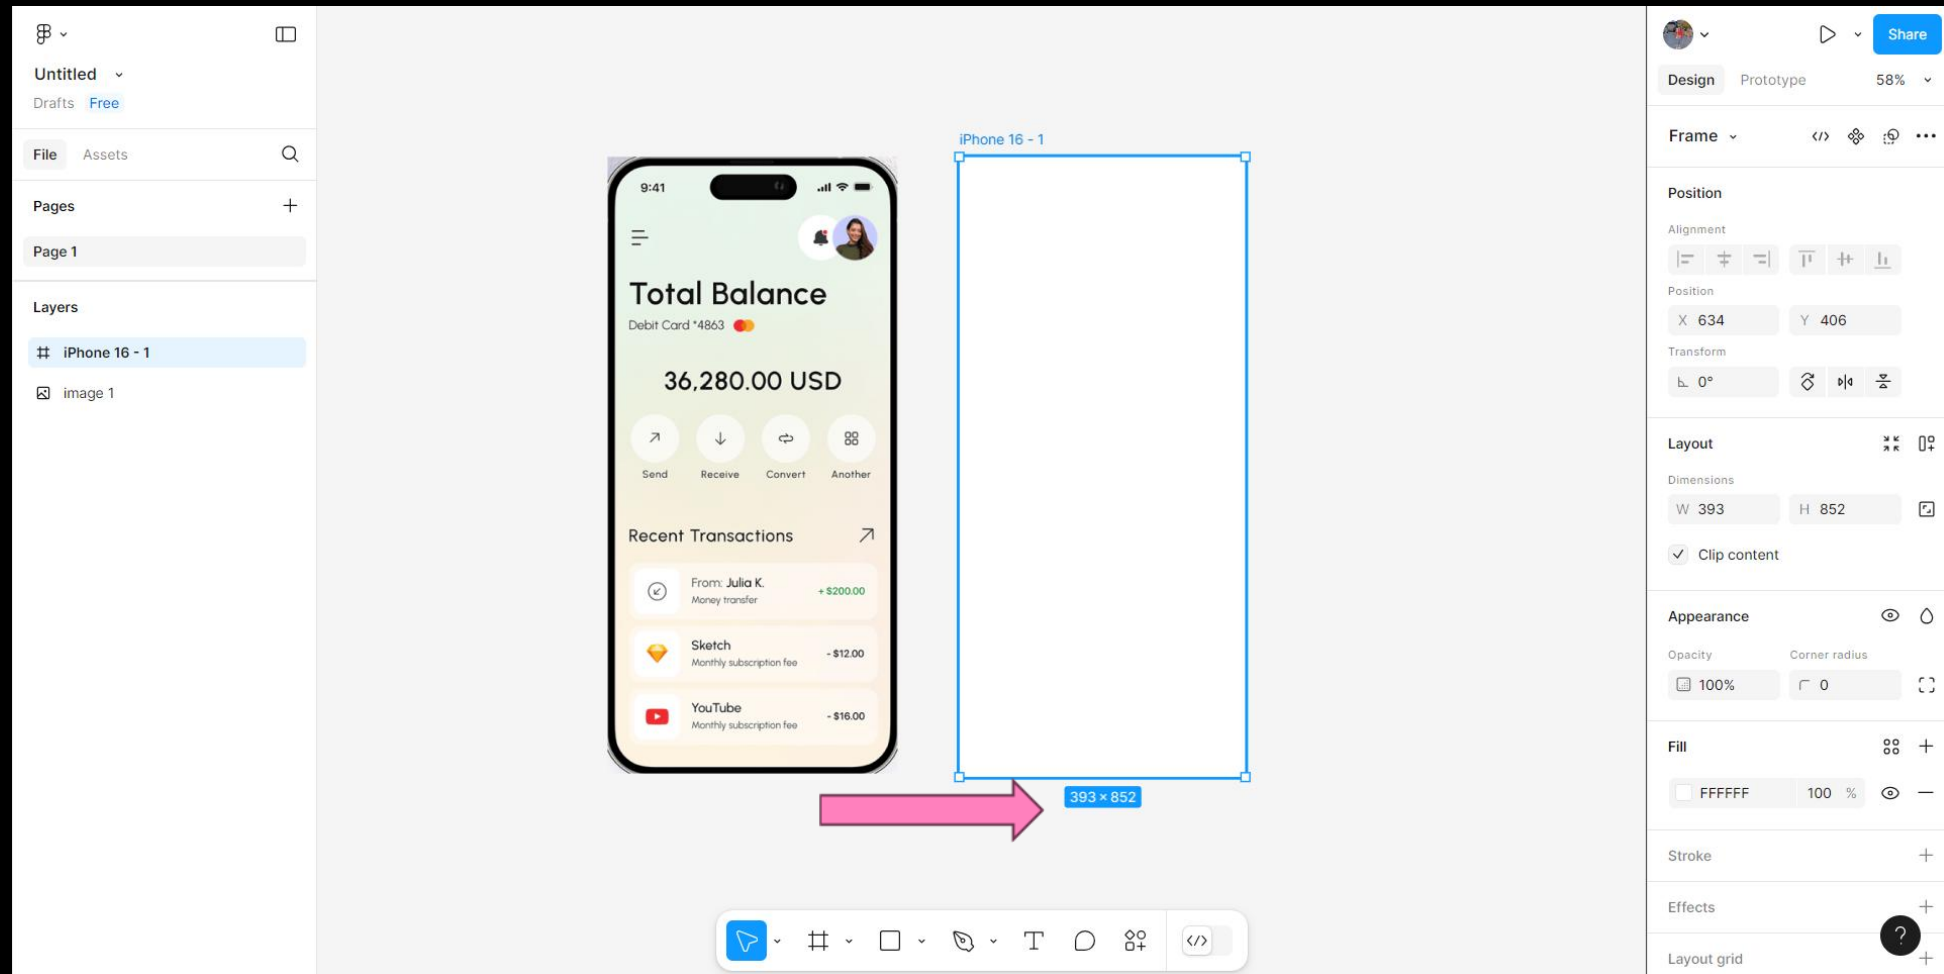

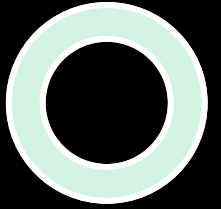

Select Frame

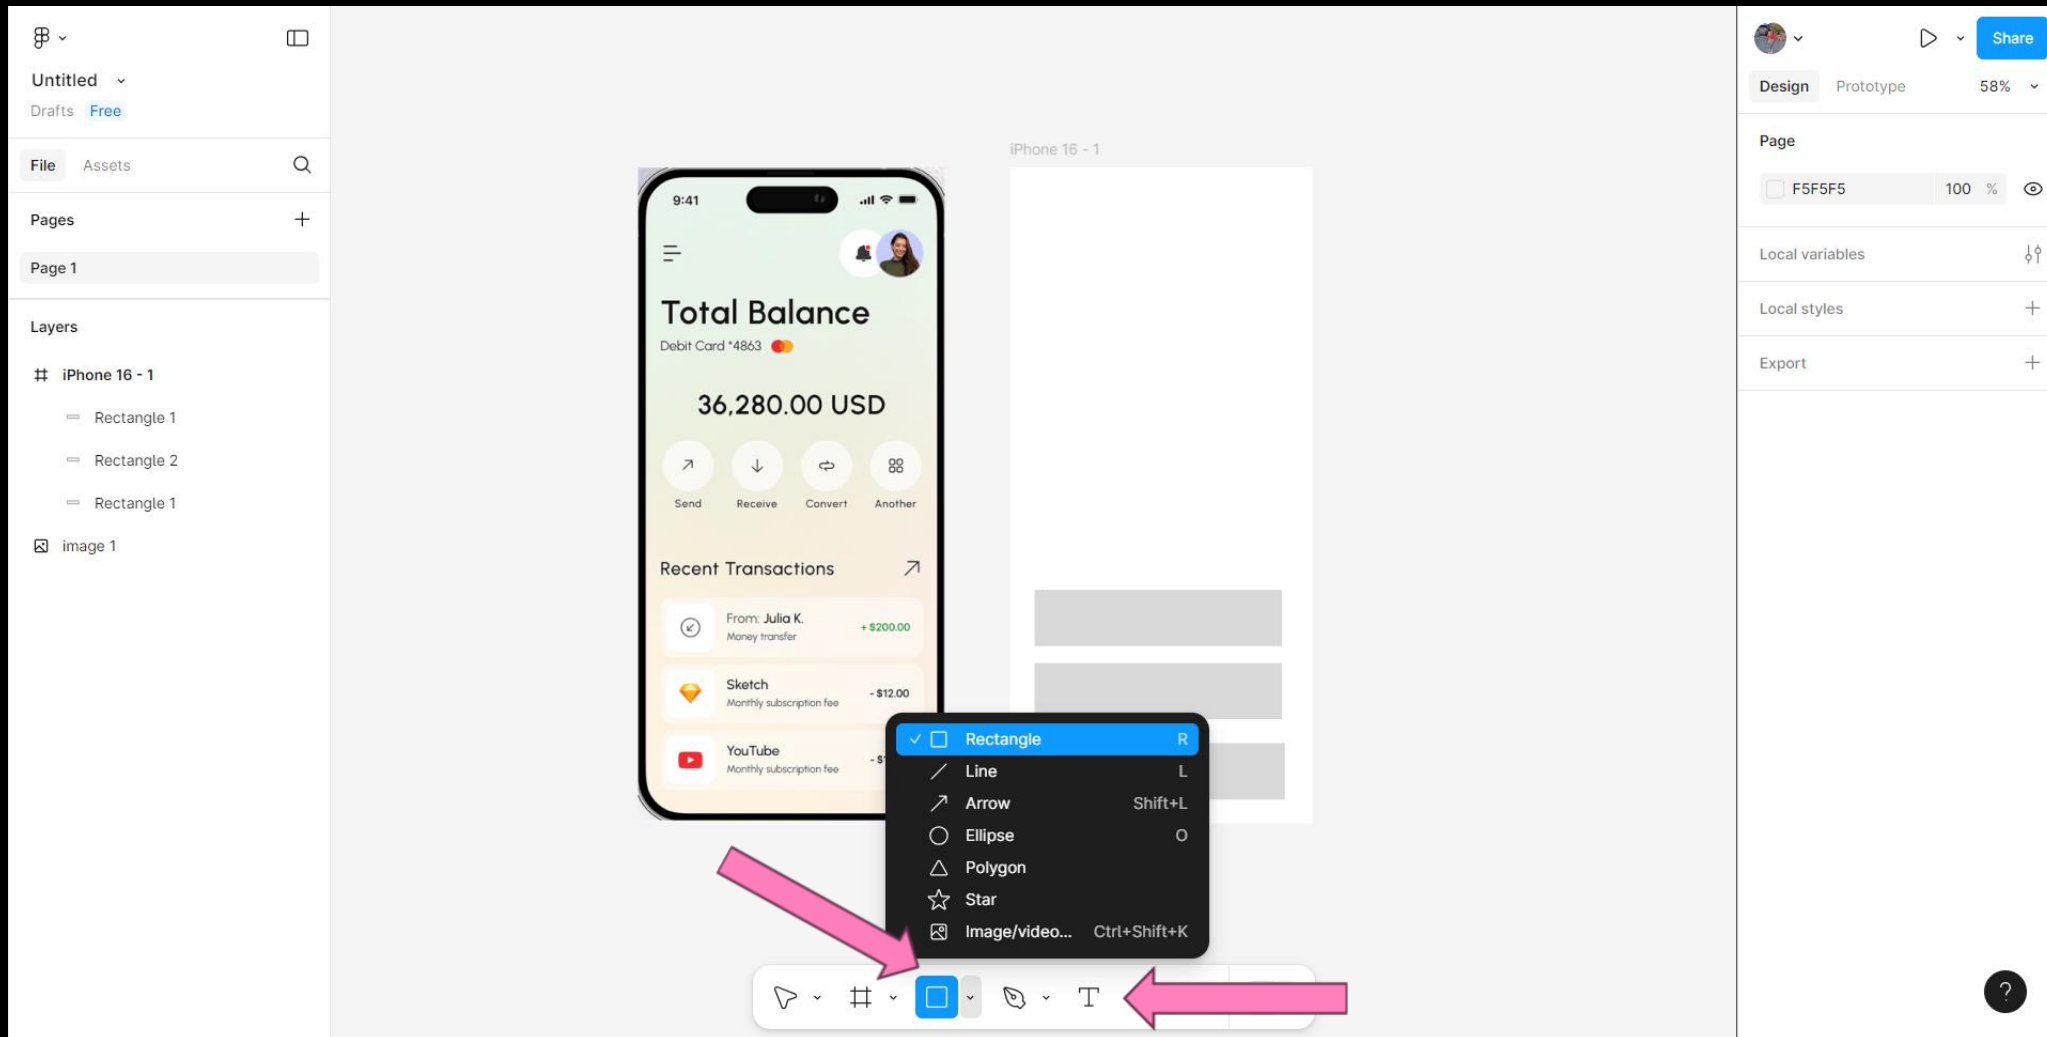

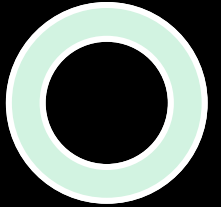

Select Android Compact/ iPhone

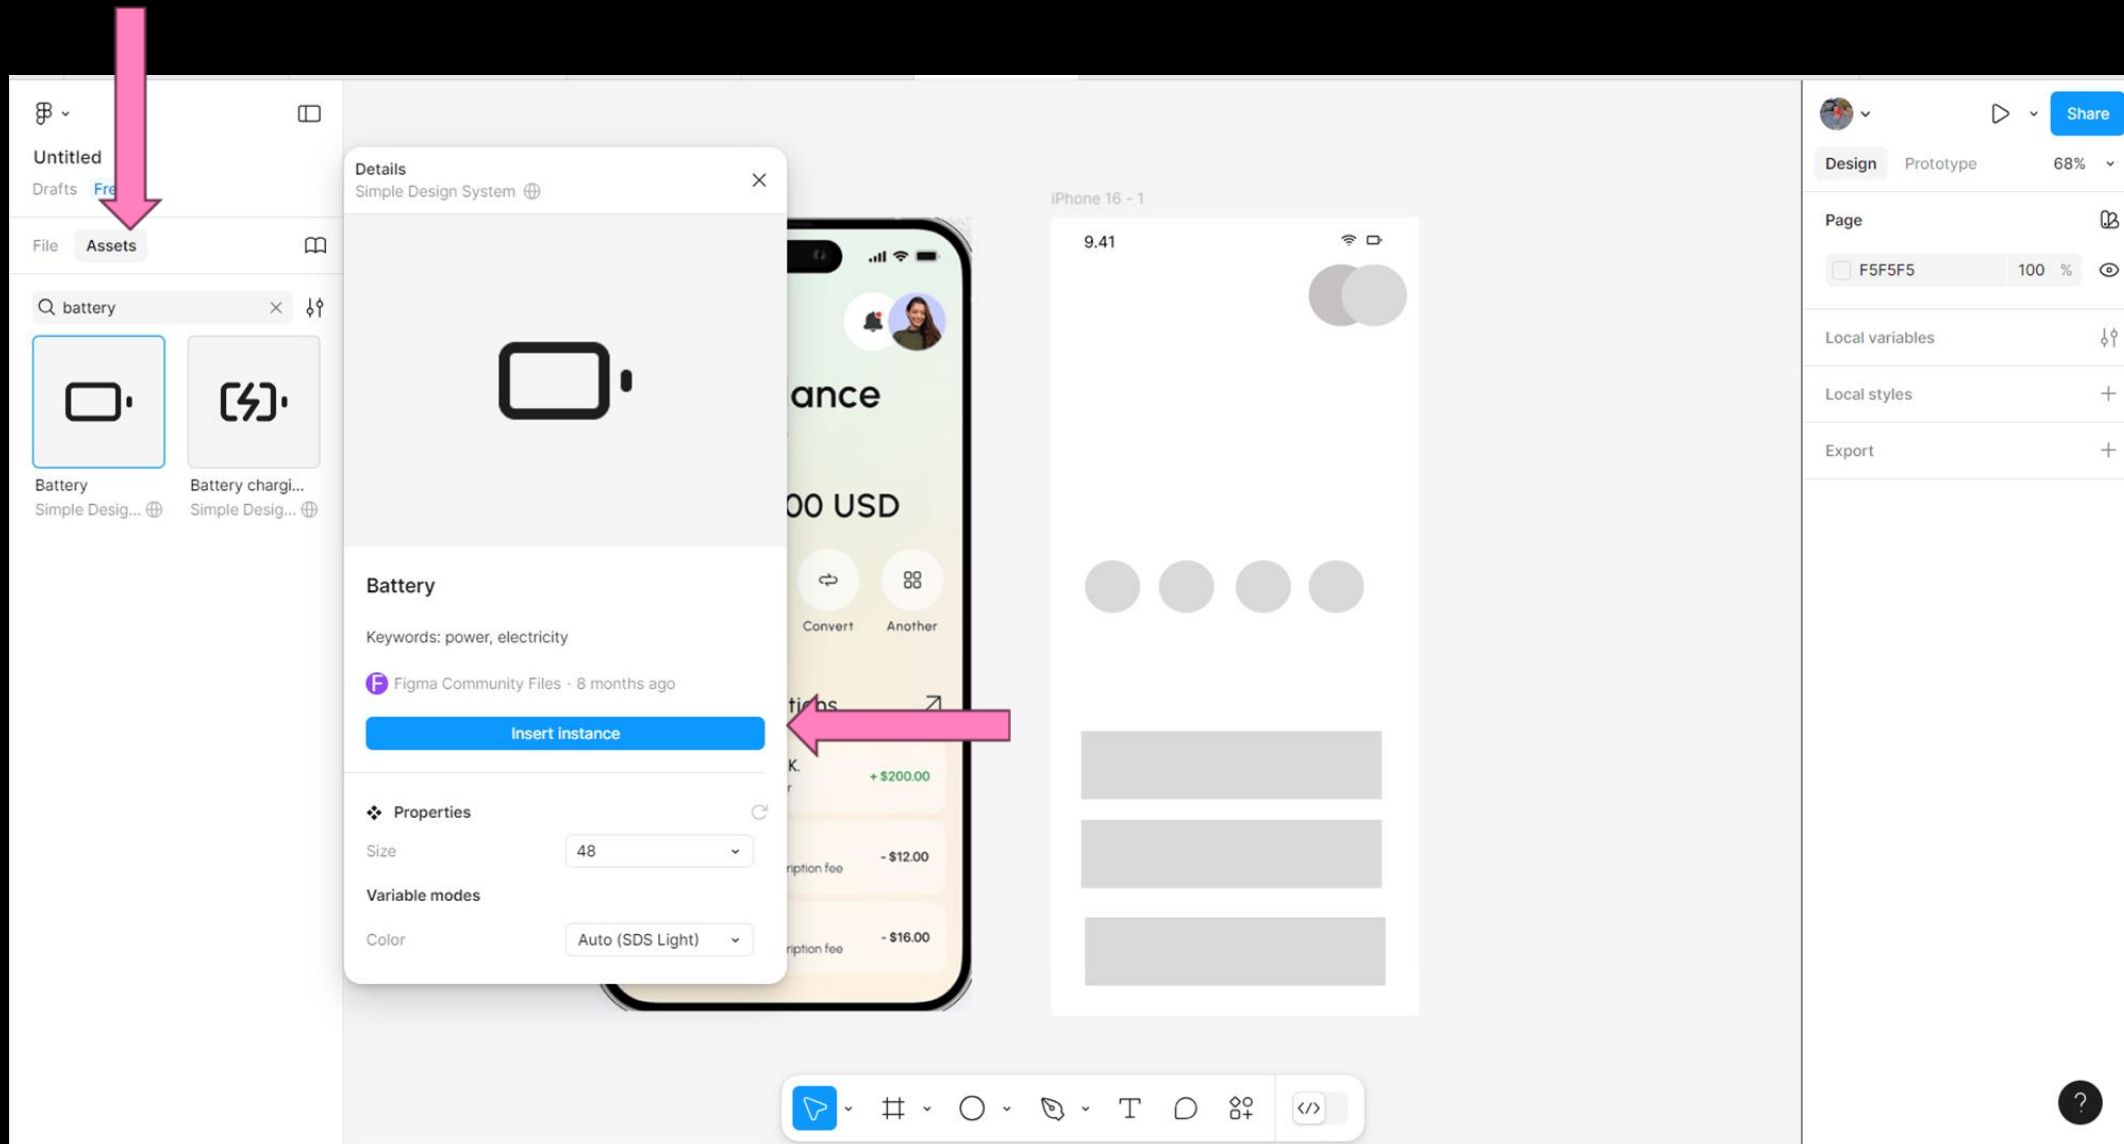

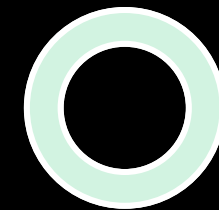

Match the ratio of the frame and the app you have chosen to improve it's design

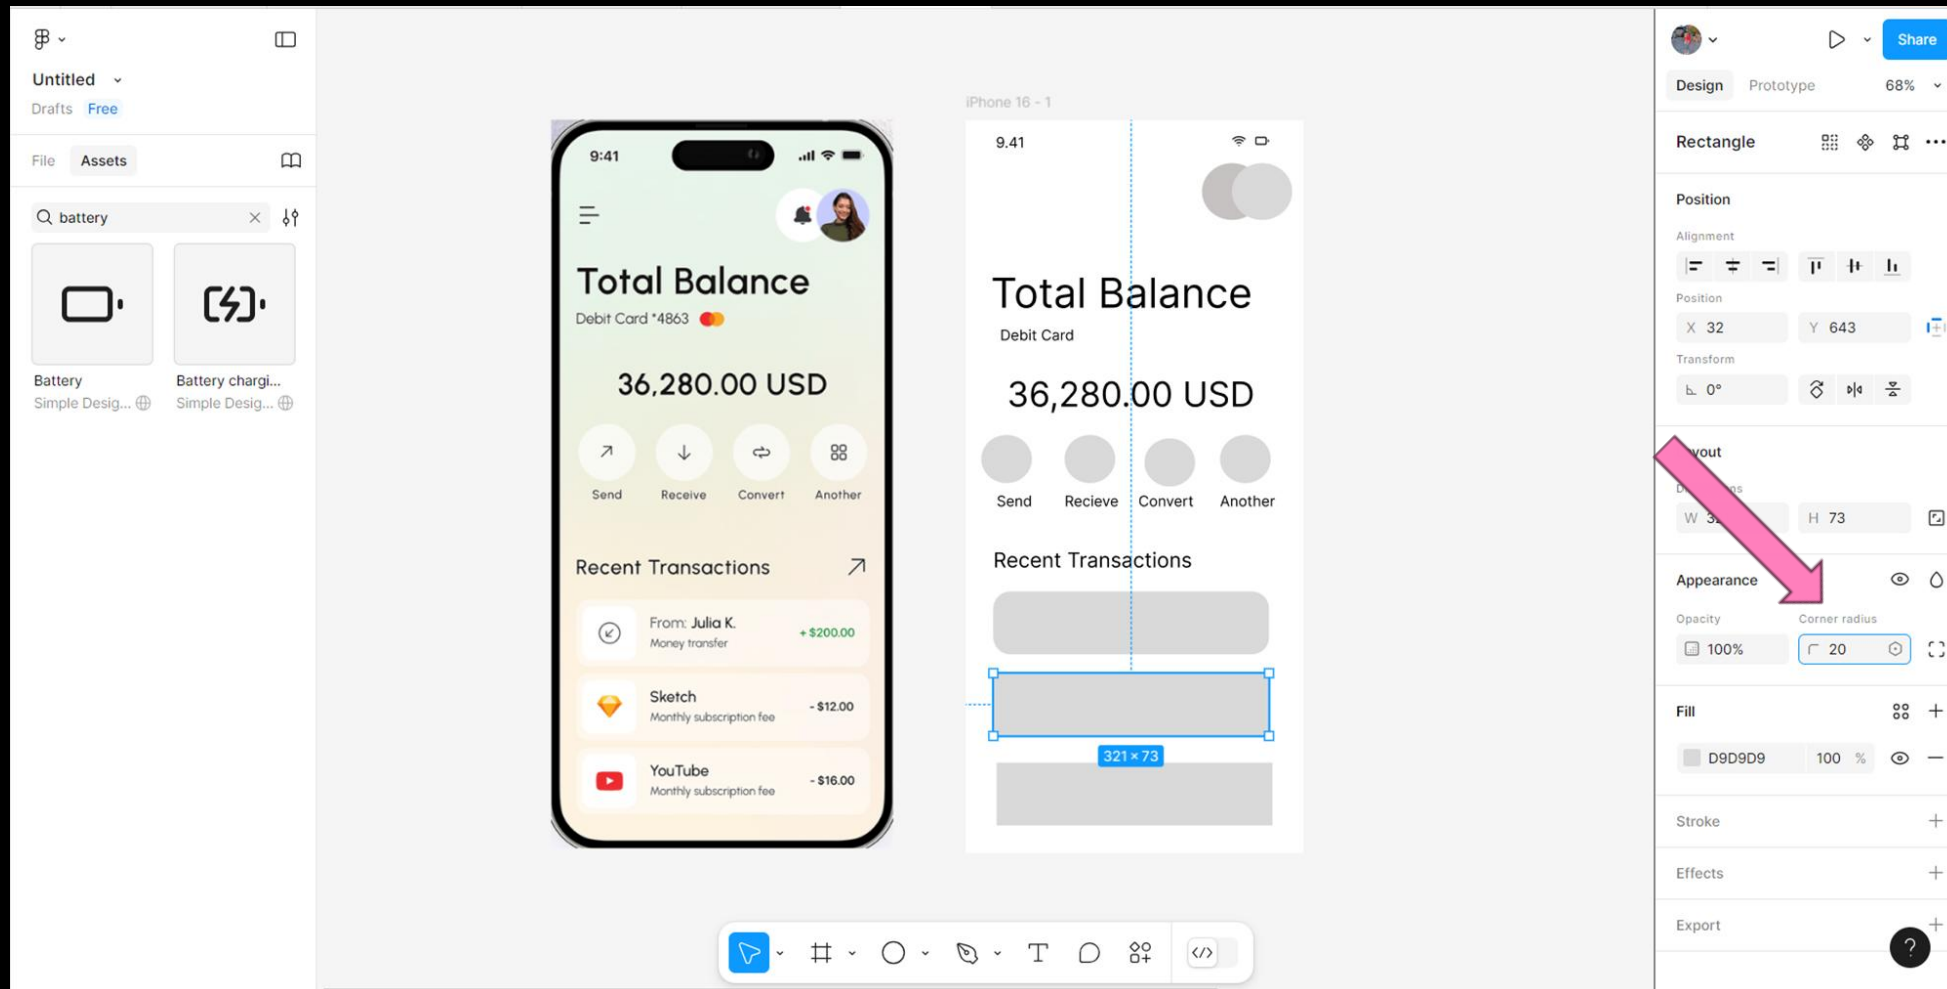

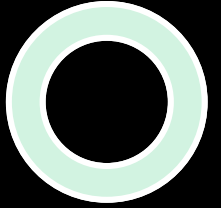

Add shapes/ text

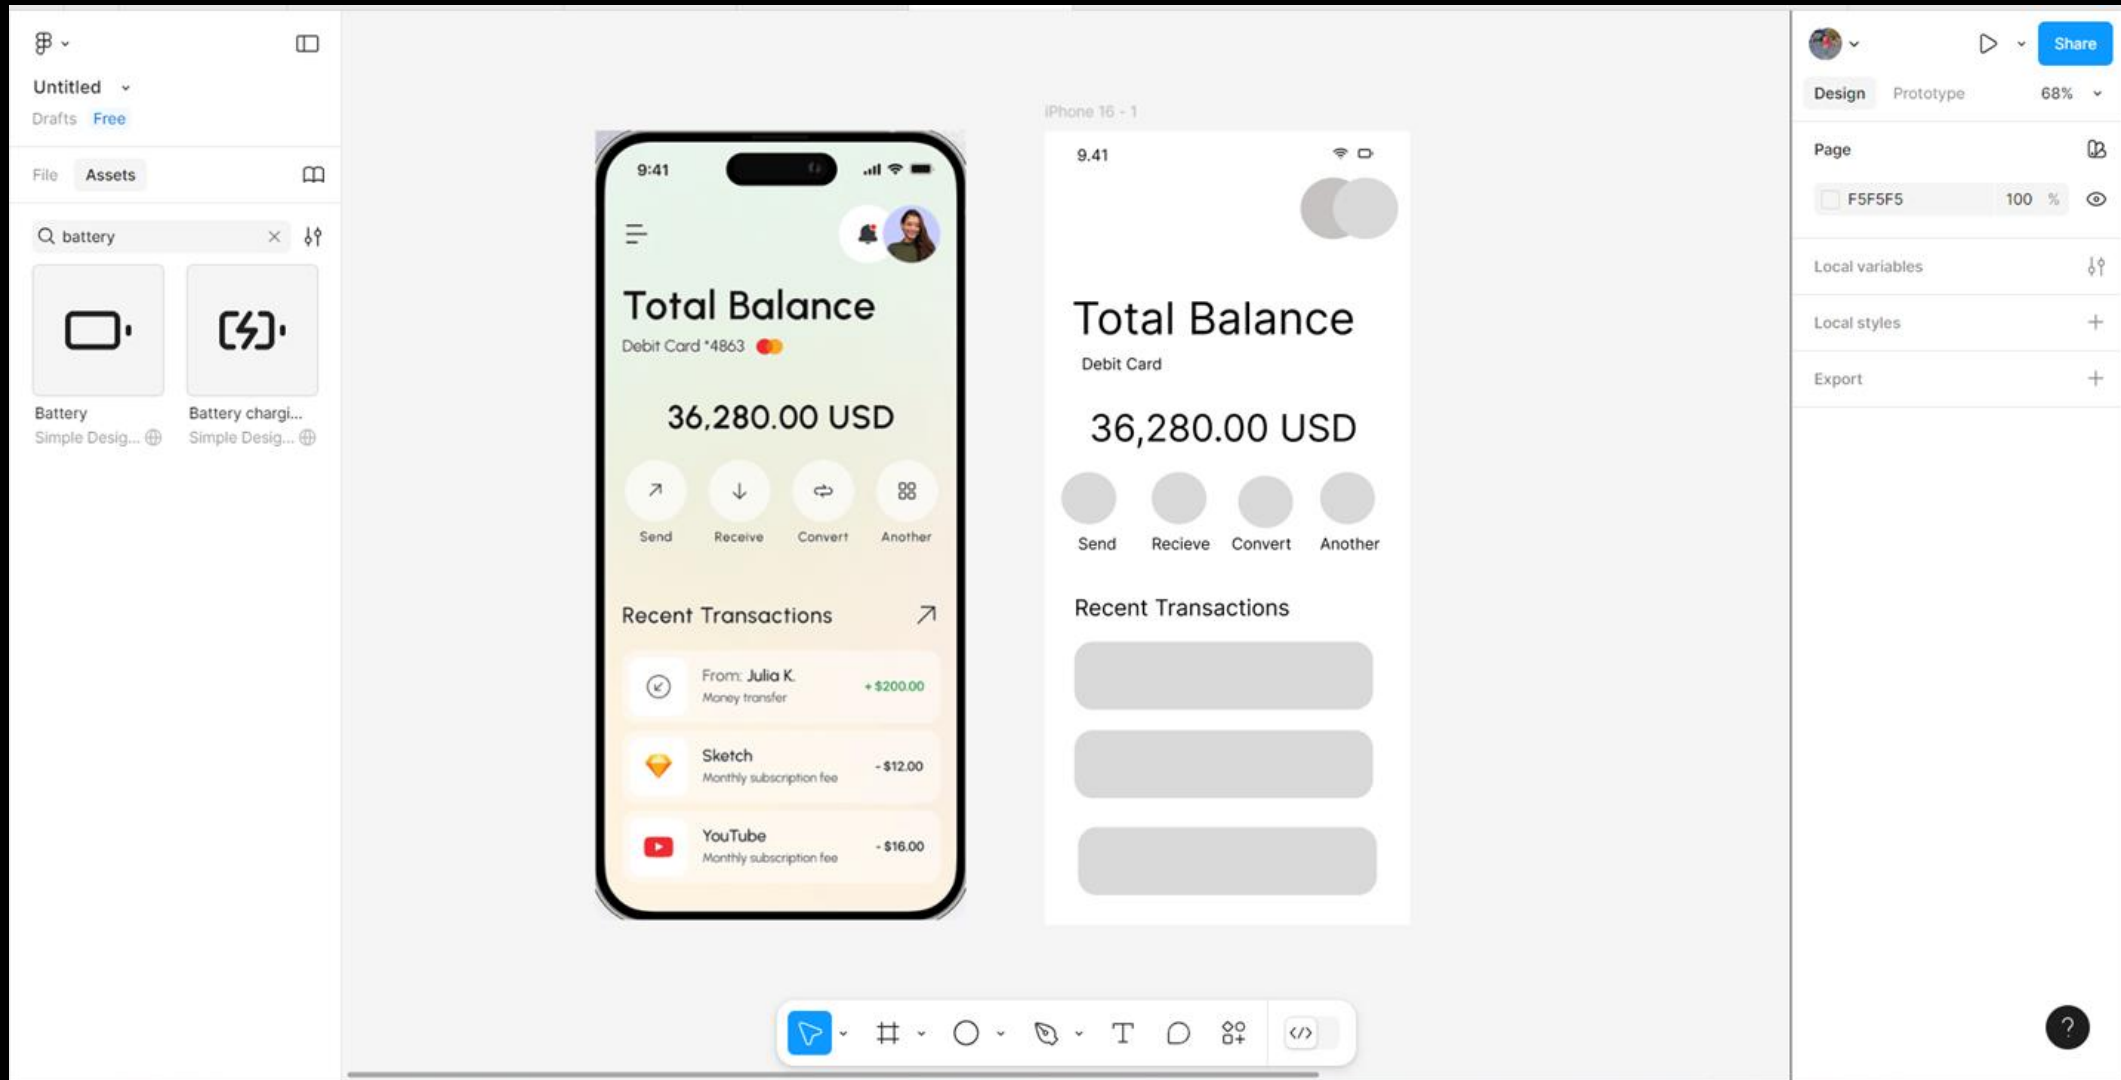

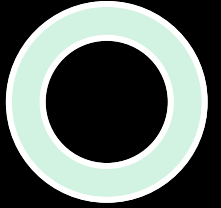

Add assets (battery, wi-fi)

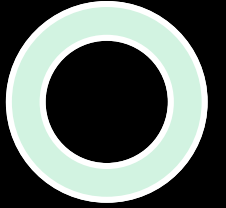

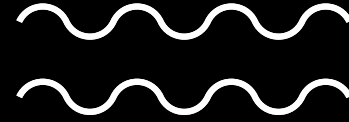

More...

Done!
